

INSTRUCTIONS FOR A GOOD GOOD TIME

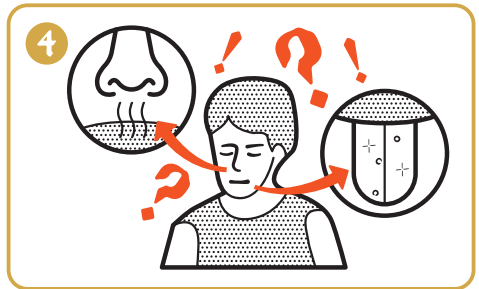

Purchase a can from your local bottle shop or use your PC computer to load the 'internet'. Please note you must go to the correct website page as some pages on the world wide web can contain adult situations.

The cans are deliberately not identified. This is not an error, and the contents are a secret, which means the flavour of each can is a delightful surprise.

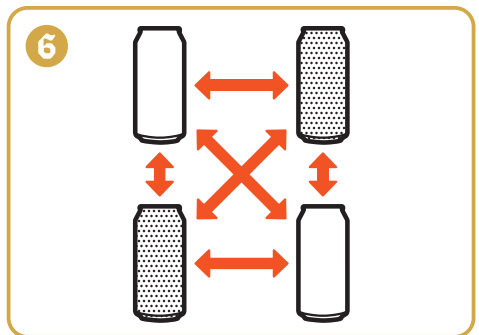

Pour your beverage into a suitable receptacle. Please choose an optically clear receptacle that is fit to hold liquid. Colanders and sieves yield disappointing results.

Smell and taste the beverage. Try to guess what the flavour is.

Scan the code on the reverse of the can using the camera on your cellular telephone. This will allow you to enter the competition. Win a case of beer every month for a year.

The beverages are in different flavours. They have been designed to mix together. Be sociable. Invite over some friends. Open up some cans and experiment with blending them together.

Let us know your results by tagging us on Instagram or Twitter.
